OFFICE OF INSPECTOR GENERAL OF EDUCATION IN MYSORE

No 6852 / 1902 Bangalore, 1st February 1905

From

H J BHABHA, Esq., Ina,

Inspector General of Education in Mysore

To B K Venkatavaradiengar Esq,
Secretary to the Government of H.H.
the Maharaja of Mysore,
General and Revenue Depts,
Bangalore

SIR,

With reference to para 2 of Order No (6532)-Edn-11-6 dated 28th January 1905, I have the honour to enclose a printed copy of Circular No 8 of 1902-03 dated 19th March 1903 on the subject of erecting sheds and keeping schools open in plague time for the information and approval of Government. When a Government school is located in a small or badly constructed building or in a crowded neighbourhood, and the people of a town or village are scattered far away in many different directions, it is not possible to construct a shed

to the school which would cause the inconvenience of even a small number of pupils - But wherever it is possible to construct a shed and collect a fair number of boys in it, Deputy Inspectors are directed to erect one either with or without help from the people - In some cases the people themselves provide a shed for the school as has been done at Taikere - In other cases the whole or a part of the cost is defrayed by the Department - In 1903-04 the construction of sheds at the cost of Government was sanctioned for the following schools

		Rs	As	Ps
Anglo-Vernacular School,	Srinivaspur	25	7	-
"	" Malur	72	15	-
"	" Hoggaddenahole	13	12	-
Hindustani Boys School at	Hole Narsipur	20	-	-

A sum of Rs 50 has been sanctioned during the current year for a shed for the Chittal droog Students' Home.

I have the honour to be,
Sir,
Your most obedient servant,
H J Bhabha
Dy Inspector General

File No 225/ 91 (1

Circular C No 8 of 1902 03

OFFICE OF THE INSPECTOR GENERAL OF EDUCATION,

To

Dated 19th March 1903

All Deputy and Assistant Deputy Inspectors of Schools

1 The Inspector General observes with regret that many Headmasters of Schools, both at Taluk Head quarters and in villages, get into a fright as soon as a case or two of plague are reported and, often with the encouragement or tacit consent of the Revenue and Medical officers, close their schools before obtaining sanction from the Educational authorities and absent themselves from their town or village so long as most people live in sheds outside the town or village This procedure on the part of masters is irregular

2 If a school house is spacious and well ventilated and is situated outside the town or village, there is no reason to close the school Boys should in that case come to school from their camp The only precautions necessary are that the school house should be opened, swept clean and freely ventilated from an early hour of the day and kept fully open till the school is dismissed in the afternoon No boys who come from infected houses or wear dirty clothes should be admitted into the school

3 When the people camp out at some distance they may prefer to have the school removed to the camp In that case they should construct a temporary school house at their own cost or with a small grant in aid from Government The temporary house may be constructed in an oblong form with a mud wall from 3 to 4 feet high on all sides, and a roof of thatch or zinc supported on cheap jungle wood posts As plague recurs every year in most places which are once infected by it, the materials of the temporary shed should be removed when the people return to their town or village and carefully preserved for future use

4 When a master goes away after closing his school without previously obtaining the permission of the Inspecting Officer to whom he is subordinate, he is not entitled to any pay from the date from which he absents himself

5 During the prevalence of plague, it may be necessary to alter the school hours and hold school only once either in the morning or afternoon for not less than four hours a day with a recess of half an hour

H J BHABHA,
Inspector General of Education
